Abstract:

Brodifacoum (0.07 ppm) and bromadiolone (0.09 ppm) were detected in the liver sample of a red fox from Sacramento County, CA. The liver sample was collected from the red fox as part of a long term genetics and population study. The cause of death for the red fox was not reported (D1106040-01 N-039-11/S10-0513).

With the present submission it would be important to have postmortem evidence of a coagulopathy for a diagnosis of anticoagulant rodenticide intoxication. In the absence of a coagulopathy, the detected concentrations are consistent with exposure (not intoxication).

ELIS Incident Report

Part B: Pesticide Information

I024154-043

County: Sacramento

State: CA

Date:

Pesticide: Brodifacoum (112701)

Type: R

Use Site: N/R

Product: N/R

Appl. Method: N/R

Appl. Rate: N/R

Formulation: N/R

Air/Ground: Gnd

Legality: Undetermined

Certainty: Exposure Only

In the absence of a coagulopathy, the detected concentrations are consistent with exposure (not intoxication).

Pesticide: Bromadiolone (112001)

Type: R

Use Site: N/R

Product: N/R

Appl. Method: N/R

Appl. Rate: N/R

Formulation: N/R

Air/Ground: Gnd

Legality: Undetermined

Certainty: Exposure Only

In the absence of a coagulopathy, the detected concentrations are consistent with exposure (not intoxication).
